ACI Structural Journal VOLUME 94, 1997

Remove this section and include it with your January through December 1997 Volume 94 issues of the *ACI Structural Journal*.

A

Aalami, B. O.—Unified minimum flexural reinforcement requirements for reinforced and prestressed concrete members (94-S38) July-Aug. 1997 . . . 409
Abdelrahman, A. A.—Serviceability of concrete beams prestressed by carbon-fiber-reinforced-plastic bars (94-S42) July-Aug. 1997 . . . 447
Abrishami, H. H.—Influence of steel fibers on tension stiffening (94-S70) Nov.-Dec. 1997 . . . 769
ACI-ASCE committee 441—High-strength concrete columns: state of the art (94-S30) May-June 1997 . . . 323
Adebar, P.—Shear tests of fiber concrete beams without stirrups (94-S8) Jan.-Feb. 1997 . . . 68
Adin, M.A.—Resistance mechanism model for reinforced concrete flat slab-column frame connections (94-S59) Nov.-Dec. 1997 . . . 653
Aggregate Interlock—Aggregate interlock and steel shear forces in the analysis of RC membrane elements (94-S16) Mar.-Apr. 1997 . . . 159
Alexander, S. D. B.—Disc. Experimental investigation on shear enhancement types of high-strength concrete plates (94-S16) Nov.-Dec. 1997 . . . 800
Alca, N. —Effect of size on flexural behavior of high-strength concrete beams (94-S7) Jan.-Feb. 1997 . . . 59
Ament, J. M.—Comparative statistical study for the ultimate stress in unbonded post-tensioning (94-S17) Mar.-Apr. 1997 . . . 171
Analytical computation of the punching strength of reinforced concrete (93-S46)
—Philippe Menétrey V. 91 Sept.-Oct. 1996, p. 503
—Disc. by I. A. E. M. Shehata Sept.-Oct. 1997 . . . 603
Anchorage
—Analysis of hysteretic behavior of anchored reinforcing bars (94-S23) May-June 1997 . . . 248
—Post-tensioned anchorage zones with single straight concentric anchorages (94-S15) Mar.-Apr. 1997 . . . 146
—Stress distribution and cracking behavior at anchorage zones in prestressed concrete members (94-S50) Sept.-Oct. 1997 . . . 549
Anchors—Tensile behavior of cast-in-place and undercut anchors in high-strength concrete (94-S53) Sept.-Oct. 1997 . . . 583
Anderson, D.—Cyclic behavior of concrete bridge bents (94-S11) Mar.-Apr. 1997 . . . 103
Arduini, M.
—Brittle failure in FRP plate and sheet bonded beams (94-S33) July-Aug. 1997 . . . 363
—Parametric study of beams with externally bonded FRP reinforcement (94-S45) Sept.-Oct. 1997 . . . 493
Aristizabal-Ochoa, J. D.
—Amplification factor for three-dimensional RC framed structures: a nonparadoxical approach (94-S49) Sept.-Oct. 1997 . . . 538
—Stability problems of columns and frames (94-S36) July-Aug. 1997 . . . 389
Ariyawardena, N.—Experimental study on thermal cracking in reinforced concrete members (94-S40) July-Aug. 1997 . . . 432
Ashour, A. F.—Tests of reinforced concrete continuous deep beams (94-S1) Jan.-Feb. 1997 . . . 3
Ashour, S. A.—Influence of steel fibers and compression reinforcement on deflection of high-strength concrete beams (94-S55) . . . 611
Attard, M. M.—Experimental tests on eccentrically loaded high-strength concrete columns (94-S27) May-June 1997 . . . 295
Axial load
—Axial load behavior of large-scale spirally-reinforced high-strength concrete columns (94-S28) May-June 1997 . . . 304
—Axial load-moment interaction for cross-sections having longitudinal reinforcement arranged in a circle (94-S63) Nov.-Dec. 1997 . . . 695
Aziz, T. S.—Rehabilitation of reinforced concrete frame connections using corrugated steel jacketing (94-S26) May-June 1997 . . . 283

B

Bank, L. C.—Three-dimensional fiber-reinforced plastic grating cages for concrete beams: a pilot study (94-S58) Nov.-Dec. 1997 . . . 643
Bars
—Analysis of hysteretic behavior of anchored reinforcing bars (94-S23) May-June 1997 . . . 248
—Bond stress-slip response of reinforcing bars embedded in FRC matrices under monotonic and cyclic loading (94-S48) Sept.-Oct. 1997 . . . 525
—Influence of steel reinforcing bars on the evaluation of early-age concrete strength using the impact-echo method (94-S35) July-Aug. 1997 . . . 378
—New look at the control of volume change cracking of base restrained concrete walls (94-S24) May-June 1997 . . . 262
Bayasi, M. Z.—Composite slab construction utilizing carbon fiber reinforced mortar (94-S41) July-Aug. 1997 . . . 442
Bayrak, O.—High-strength concrete columns under simulated earthquake loading (94-S65) Nov.-Dec. 1997 . . . 708
Beams
—Analysis and design of steel fiber reinforced concrete beams (94-S54) Sept.-Oct. 1997 . . . 595
—Effects of deviators and tendon configuration on behavior of externally prestressed beams (94-S2) Jan.-Feb. 1997 . . . 13
—Parametric study of beams with externally bonded FRP reinforcement (94-S45) Sept.-Oct. 1997 . . . 493
—Serviceability of concrete beams prestressed by carbon-fiber-reinforced-plastic bars (94-S42) July-Aug. 1997 . . . 447
—Shear tests of fiber concrete beams without stirrups (94-S8) Jan.-Feb. 1997 . . . 68
—Stirrup effectiveness in reinforced concrete beams under flexure and shear (94-S21) May-June 1997 . . . 227
—Stresses and strains in composite concrete beams subjected to differential shrinkage (94-S31) July-Aug. 1997 . . . 347
—Tests of reinforced concrete continuous deep beams (94-S1) Jan.-Feb. 1997 . . . 3
Beams, composite—Shrinkage behavior of steel-concrete composite beams (94-S56) Nov.-Dec. 1997 . . . 625
Beams, deep—Main tension steel in high-strength concrete deep and short beams (94-S69) Nov.-Dec. 1997 . . . 752
Beams, high-strength concrete
—Effect of size on flexural behavior of high-strength concrete beams (94-S7) Jan.-Feb. 1997 . . . 59
—Flexural behavior of high-strength concrete beams (94-S60) Nov.-Dec. 1997 . . . 663
—Influence of steel fibers and compression reinforcement on deflection of high-strength concrete beams (94-S55) . . . 611
—Main tension steel in high-strength concrete deep and short beams (94-S69) Nov.-Dec. 1997 . . . 752
Beams, reinforced concrete—Renewed assessment of creep and shrinkage effects in reinforced concrete beams (94-S68) Nov.-Dec. 1997 . . . 745
Beams, sheet bonded—Brittle failure in FRP plate and sheet bonded beams (94-S33) July-Aug. 1997 . . . 363
Bearing systems
—SP-164 . . . 216
Behavior of structural concrete elements designed to the concept of the compressive force path (93-S40)
—Michael D. Kotsovos and Paul Michelis V. 93 July-Aug. 1996, p. 428
—Disc. by F. Mbakogu May-June 1997 . . . 338
Bhattacharjee, S. S.—Fracture mechanics application to evaluate the failure mode and ultimate strength of tailgate walls in a hydropower plant (94-S62) Nov.-Dec. 1997 . . . 686

Biddah, A.—Rehabilitation of reinforced concrete frame connections using corrugated steel jacketing (94-S26) May-June 1997 . . . 283
Blast effects
—Assessment of reinforcement details for blast containment structures (94-S13) Mar.-Apr. 1997 . . . 124
—Retrofit of reinforced concrete structures to resist blast effects (94-S34) July-Aug. 1997 . . . 371
Bonded plates—SP-165 . . . 217
Bonded reinforcement—Parametric study of beams with externally bonded FRP reinforcement (94-S45) Sept.-Oct. 1997 . . . 493
Box girders—Full-scale testing and analysis of 20-year-old pretensioned concrete box girders (94-S43) Sept.-Oct. 1997 . . . 471
Bradford, M. A.—Service load analysis of slender R-C columns (94-S61) Nov.-Dec. 1997 . . . 675
Breen, J. E.—Post-tensioned anchorage zones with single straight concentric anchorages (94-S15) Mar.-Apr. 1997 . . . 146
Bridges
—Behavior of CFRP for prestressing and shear reinforcements of concrete highway bridges (94-S9) Jan.-Feb. 1997 . . . 77
—Cyclic behavior of concrete bridge bents (94-S11) Mar.-Apr. 1997 . . . 103
—Response modification factors for seismic design of circular reinforced concrete bridge columns (94-S3) Jan.-Feb. 1997 . . . 23
Brittle failure—Brittle failure in FRP plate and sheet bonded beams (94-S33) July-Aug. 1997 . . . 363
Buildings
—Behavior of gravity load designed reinforced concrete buildings subjected to earthquakes (94-S14) Mar.-Apr. 1997 . . . 133
—Seismic vulnerability assessment of low-rise buildings in regions with infrequent earthquakes (94-S4) Jan.-Feb. 1997 . . . 31

C

Casanova, P.—Analysis and design of steel fiber reinforced concrete beams (94-S54) Sept.-Oct. 1997 . . . 595
Cast-in-place concrete—Tensile behavior of cast-in-place and undercut anchors in high-strength concrete (94-S53) Sept.-Oct. 1997 . . . 583
Chai, Y. H.—Seismic assessment of the Santa Monica viaduct bent details (94-S47) Sept.-Oct. 1997 . . . 513
Chakrabarti, P. R.—Comparative statistical study for the ultimate stress in unbonded post-tensioning (94-S17) Mar.-Apr. 1997 . . . 171
Chin, M. S.—Flexural behavior of high-strength concrete beams (94-S60) Nov.-Dec. 1997 . . . 663
Columns
—Axial load behavior of large-scale spirally-reinforced high-strength concrete columns (94-S28) May-June 1997 . . . 304
—Experimental tests on eccentrically loaded high-strength concrete columns (94-S27) May-June 1997 . . . 295
—Performance-based approach for the design of confining steel in tied columns (94-S39) July-Aug. 1997 . . . 421
—Performance of high-strength concrete tied columns: a parametric study (94-S10) Mar.-Apr. 1997 . . . 91
—Response modification factors for seismic design of circular reinforced concrete bridge columns (94-S3) Jan.-Feb. 1997 . . . 23
—Seismic response of slab-column connections constructed with high-strength concrete (94-S19) Mar.-Apr. 1997 . . . 197
—Stability problems of columns and frames (94-S36) July-Aug. 1997 . . . 389
—Verification of proposed design methodologies for effective width of slabs in slab-column frames (94-S18) Mar.-Apr. 1997 . . . 181
Columns, concrete-filled—State of the art of concrete-filled steel tubular columns (94-S51) Sept.-Oct. 1997 . . . 558
Columns, high-strength concrete—High-strength concrete columns under simulated earthquake loading (94-S65) Nov.-Dec. 1997 . . . 708
Columns, slender—Service load analysis of slender R-C columns (94-S61) Nov.-Dec. 1997 . . . 675
Columns, tied—Performance-based approach for the design of confining steel in tied columns (94-S39) July-Aug. 1997 . . . 421
Composite construction
—Composite slab construction utilizing carbon fiber reinforced mortar (94-S41) July-Aug. 1997 . . . 442
—Flexural behavior of composite R.C.-slurry infiltrated mat concrete (SIMCON) members (94-S46) Sept.-Oct. 1997 . . . 502
Composite construction, beams
—Shrinkage behavior of steel-concrete composite beams (94-S56) Nov.-Dec.1997 . . . 625
—Stresses and strains in composite concrete beams subjected to differential shrinkage (94-S31) July-Aug. 1997 . . . 347
Compression—Influence of steel fibers and compression reinforcement on deflection of high-strength concrete beams (94-S55) Nov.-Dec. 1997 . . . 611
Concrete
—Modification of the ACI rectangular stress block for high-strength concrete (94-S5) Jan.-Feb. 1997 . . . 40
—Studies of multiaxial shear strengths for roller-compacted concrete (94-S12) Mar.-Apr. 1997 . . . 114
Concrete, steel fiber reinforced
—Analysis and design of steel fiber reinforced concrete beams (94-S54) Sept.-Oct. 1997 . . . 595
—Influence of steel fibers and compression reinforcement on deflection of high-strength concrete beams (94-S55) Nov.-Dec. 1997 . . . 611
Connections
—Rehabilitation of reinforced concrete frame connections using corrugated steel jacketing (94-S26) May-June 1997 . . . 283
—Seismic response of slab-column connections constructed with high-strength concrete (94-S19) Mar.-Apr. 1997 . . . 197
Construction loads—Flat slab thickness required to satisfy serviceability including early age construction loads (94-S64) Nov.-Dec. 1997 . . . 700
Containment structures—Assessment of reinforcement details for blast containment structures (94-S13) Mar.-Apr. 1997 . . . 124
Cracking
—Crack angle and strain compatibility for shear resistance in reinforced concrete panel structures (94-S22) May-June 1997 . . . 239
—New look at the control of volume change cracking of base restrained concrete Walls (94-S24) May-June 1997 . . . 262
—Stress distribution and cracking behavior at anchorage zones in prestressed concrete members (94-S50) Sept.-Oct. 1997 . . . 549
Cracking, thermal—Experimental study on thermal cracking in reinforced concrete members (94-S40) July-Aug. 1997 . . . 432
Crawford, J. E.—Retrofit of reinforced concrete structures to resist blast effects (94-S34) July-Aug. 1997 . . . 371
Creep—Renewed assessment of creep and shrinkage effects in reinforced concrete beams (94-S68) Nov.-Dec. 1997 . . . 745
Culp, T. D.—Full scale testing of precast concrete sandwich panels (94-S32) July-Aug. 1997 . . . 354

D

Deflection—Influence of steel fibers and compression reinforcement on deflection of high-strength concrete beams (94-S55) Nov.-Dec. 1997 . . . 611
Design
—Behavior of gravity load designed reinforced concrete buildings subjected to earthquakes (94-S14) Mar.-Apr. 1997 . . . 133
—Performance-based approach for the design of confining steel in tied columns (94-S39) July-Aug. 1997 . . . 421
Di Tommaso, A.—Brittle failure in FRP plate and sheet bonded beams (94-S33) July-Aug. 1997 . . . 363
Dogan, E.—Flexural behavior of composite R.C.-slurry infiltrated mat concrete (SIMCON) members (94-S46) Sept.-Oct. 1997 . . . 502
Douglas, B.—Full-scale testing and analysis of 20-year-old pretensioned concrete box girders (94-S43) Sept.-Oct. 1997 . . . 471

E

Earthquake loads—Seismic response of slab-column connections constructed with high-strength concrete (94-S19) Mar.-Apr. 1997 . . . 197
Eccentric loads—Experimental tests on eccentrically loaded high-strength concrete columns (94-S27) May-June 1997 . . . 295
Ehsani, M. R.—Repair of earthquake-damaged RC columns with FRP wraps (94-S20) Mar.-Apr. 1997 . . . 206
Einea, A.—Full scale testing of precast concrete sandwich panels (94-S32) July-Aug. 1997 . . . 354
El-Attar, A. G.—Behavior of gravity load designed reinforced concrete buildings subjected to earthquakes (94-S14) Mar.-Apr. 1997 . . . 133
Elbadry, M.—Experimental study on thermal cracking in reinforced concrete members (94-S40) July-Aug. 1997 . . . 432

Emam, M.—Seismic response of slab-column connections constructed with high-strength concrete (94-S19) Mar.-Apr. 1997 197
English, D.—Cyclic behavior of concrete bridge bents (94-S11) Mar.-Apr. 1997 103
Everard, N. J.—Axial load-moment interaction for cross-sections having longitudinal reinforcement arranged in a circle (94-S63) Nov.-Dec. 1997 695
Experimental investigation on shear enhancement types of high-strength concrete plates (94-S16)
—H. Marzouk and Dajiu Jiang V. 94 Jan.-Feb 1997, p. 49
—Disc. by S. D. B. Alexander Nov.-Dec. 1997 800

F

Failure—Fracture mechanics application to evaluate the failure mode and ultimate strength of tailgate walls in a hydropower plant (94-S62) Nov.-Dec. 1997 686
Fam, A. Z.—Behavior of CFRP for prestressing and shear reinforcements of concrete highway bridges (94-S9) Jan.-Feb. 1997 77
Fiber-reinforced concrete
—Bond stress-slip response of reinforcing bars embedded in FRC matrices under monotonic and cyclic loading (94-S48) Sept.-Oct. 1997 525
—Shear tests of fiber concrete beams without stirrups (94-S8) Jan.-Feb. 1997 68
Fiber-reinforced mortar—Composite slab construction utilizing carbon fiber reinforced mortar (94-S41) July-Aug. 1997 442
Fiber-reinforced plastic
—Brittle failure in FRP plate and sheet bonded beams (94-S33) July-Aug. 1997 363
—Parametric study of beams with externally bonded FRP reinforcement (94-S45) Sept.-Oct. 1997 493
—Repair of earthquake-damaged RC columns with FRP wraps (94-S20) Mar.-Apr. 1997 206
—Serviceability of concrete beams prestressed by carbon-fiber-reinforced-plastic bars (94-S42) July-Aug. 1997 447
Filippou, F. C.—Analysis of hysteretic behavior of anchored reinforcing bars (94-S23) May-June 1997 248
Finite element analysis—Nonlinear finite element analysis of planar reinforced concrete members subjected to fires (94-S25) May-June 1997 272
Flexure
—Effect of size on flexural behavior of high-strength concrete beams (94-S7) Jan.-Feb. 1997 59
—Evaluation of seismic damage indices for concrete elements loaded in combined shear and flexure (94-S29) May-June 1997 315
—Flexural behavior of composite R.C.-slurry infiltrated mat concrete (SIMCON) members (94-S46) Sept.-Oct. 1997 502
—Flexural behavior of high-strength concrete beams (94-S60) Nov.-Dec. 1997 663
—Stirrup effectiveness in reinforced concrete beams under flexure and shear (94-S21) May-June 1997 227
—Unified minimum flexural reinforcement requirements for reinforced and prestressed concrete members (94-S38) July-Aug. 1997 409
Foster, S. J.—Experimental tests on eccentrically loaded high-strength concrete columns (94-S27) May-June 1997 295
Fourth world congress on joint sealing and bearing systems for concrete structures—SP-164 216
Fracture mechanics—Fracture mechanics application to evaluate the failure mode and ultimate strength of tailgate walls in a hydropower plant (94-S62) Nov.-Dec. 1997 686
Frames
—Rehabilitation of reinforced concrete frame connections using corrugated steel jacketing (94-S26) May-June 1997 283
—Stability problems of columns and frames (94-S36) July-Aug. 1997 389
Frames, slab-column
—Resistance mechanism model for reinforced concrete flat slab-column frame connections (94-S59) Nov.-Dec. 1997 653
—Seismic response of slab-column connections constructed with high-strength concrete (94-S19) Mar.-Apr. 1997 197
—Verification of proposed design methodologies for effective width of slabs in slab-column frames (94-S18) Mar.-Apr. 1997 ... 181
Freyermuth, C. L.—Unified minimum flexural reinforcement requirements for reinforced and prestressed concrete members (94-S38) July-Aug. 1997 409
Frostig, Y.—Three-dimensional fiber-reinforced plastic grating cages for concrete beams: a pilot study (94-S58) Nov.-Dec. 1997 643

G

Gardner, N. J.—Flat slab thickness required to satisfy serviceability including early age construction loads (94-S64) Nov.-Dec. 1997 700
Gaspersic, P.—Response modification factors for seismic design of circular reinforced concrete bridge columns (94-S3) Jan.-Feb. 1997 23
Gergely, P.—Behavior of gravity load designed reinforced concrete buildings subjected to earthquakes (94-S14) Mar.-Apr. 1997 133
Ghali, A.—Experimental study on thermal cracking in reinforced concrete members (94-S40) July-Aug. 1997 432
Ghobarah, A.—Rehabilitation of reinforced concrete frame connections using corrugated steel jacketing (94-S26) May-June 1997 283
Girders
—Full-scale testing and analysis of 20-year-old prestressed concrete box girders (94-S43) Sept.-Oct. 1997 471
—hollow—ACI shear and torsion provisions for prestressed hollow girders (94-S72) Nov.-Dec. 1997 787
Gocevski, V.—Fracture mechanics application to evaluate the failure mode and ultimate strength of tailgate walls in a hydropower plant (94-S62) Nov.-Dec. 1997 686
Gravity loads—Behavior of gravity load designed reinforced concrete buildings subjected to earthquakes (94-S14) Mar.-Apr. 1997 133
Grossman, J. S.—Verification of proposed design methodologies for effective width of slabs in slab-column frames (94-S18) Mar.-Apr. 1997 181

H

Hassan, A. F. —Seismic vulnerability assessment of low-rise buildings in regions with infrequent earthquakes (94-S4) Jan.-Feb. 1997 31
High-strength concrete
—Axial load behavior of large-scale spirally-reinforced high-strength concrete columns (94-S28) May-June 1997 304
—Effect of size on flexural behavior of high-strength concrete beams (94-S7) Jan.-Feb. 1997 59
—Effect of web reinforcement on high-strength concrete deep beams (94-S52) Sept.-Oct. 1997 572
—Experimental investigation on shear enhancement types for high-strength concrete beams (94-S7) Jan.-Feb. 1997 49
—Experimental tests on eccentrically loaded high-strength concrete columns (94-S27) May-June 1997 295
—High-strength concrete columns under simulated earthquake loading (94-S65) Nov.-Dec. 1997 708
—Influence of steel fibers and compression reinforcement on deflection of high-strength concrete beams (94-S55) Nov.-Dec. 1997 611
—Modification of the ACI rectangular stress block for high-strength concrete (94-S5) Jan.-Feb. 1997 40
—Performance of high-strength concrete tied columns: a parametric study (94-S10) Mar.-Apr. 1997 91
—Seismic response of slab-column connections constructed with high-strength concrete (94-S19) Mar.-Apr. 1997 197
—Tensile behavior of cast-in-place and undercut anchors in high-strength concrete (94-S53) Sept.-Oct. 1997 583
Hilal, M. S.—Seismic response of slab-column connections constructed with high-strength concrete (94-S19) Mar.-Apr. 1997 197
Hota, S.—Bond stress-slip response of reinforcing bars embedded in FRC matrices under monotonic and cyclic loading (94-S48) Sept.-Oct. 1997 525
Hsu, T. T. C.
—ACI shear and torsion provisions for prestressed hollow girders (94-S72) Nov.-Dec. 1997 787

—Nonlinear analysis of membrane elements by fixed-angle softened-truss model (94-S44) Sept.-Oct. 1997 483
Huang, Z.—Nonlinear finite element analysis of planar reinforced concrete members subjected to fires (94-S25) May-June 1997 272
Hysteresis
—Analysis of hysteretic behavior of anchored reinforcing bars (94-S23) May-June 1997 248
—New look at the control of volume change cracking of base restrained concrete walls (94-S24) May-June 1997 262

I

Ibrahim, H. H. H.—Modification of the ACI rectangular stress block for high-strength concrete (94-S5) Jan.-Feb. 1997 40
Impact-echo tests—Influence of steel reinforcing bars on the evaluation of early-age concrete strength using the impact-echo method (94-S35) July-Aug. 1997 378
Itani, A.—Response modification factors for seismic design of circular reinforced concrete bridge columns (94-S3) Jan.-Feb. 1997 23
